

The Story in the Stats

Northland Community Health Assessment 2025

To serve the community, you need to know the community! Every three years, the Northland Health Alliance gathers information from surveys, forums, and verified data sources to create a Community Health Assessment (CHA).

The resulting CHA dashboard is a valuable resource for anyone who wants to better understand the needs and struggles of the people of Clay & Platte counties. In the same way that NHA has created task forces to tackle the biggest needs, we hope you'll use the CHA in ways that positively impact your community.

When you visit the online dashboard, you'll find interactive graphs, downloadable data, and helpful descriptions for understanding what you're seeing.

30.4% of Northland adults have high blood pressure.

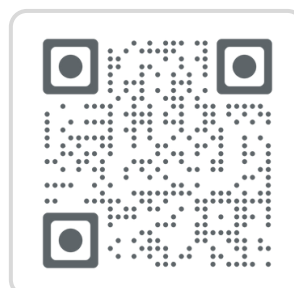

1 in 5 Northland adults have not visited the dentist in the past 2 years.

1,591 young adults (ages 15-24) in Clay County were hospitalized due to mental health between 2021-2023.

8,967 females per 1 OBGYN in Platte County, with 6 total providers in the area. Clay County has 37 providers, serving 3,456 females each.
